& PLANNING

525 North Main Street
Waynesville, NC 28786

Phone: (828) 456-8383
Fax: (828) 456-8797

J.M. Teague Engineering & Planning (JMTE) teamed with Kostelec Planning to perform a comprehensive pedestrian plan for the Town of Forest City, North Carolina.

JMTE was tasked with discerning relevant information from existing data and past plans - especially information related to pedestrian movements, and complete streets. JMTE assisted with conducting a field evaluation of existing and planned facilities, developed materials for and attended Steering Committee and Public meetings, attended a Health Impact Workshop and helped inform Activity Connection Plan, reviewed existing design standards for the Town of Forest City and made recommendations for modification to fit current design standards (including MUTDC, AASHTO and ADA).

JMTE updated existing design guidelines and modified conceptual NCDOT Complete Streets Guidelines cross sections to recommend improvements on three priority corridors in the Town of Forest City.

JMTE assisted in developing project and program recommendations related to pedestrian safety and project development.
