JMTE Academy is approved by NCDOT to teach the Work Zone Flagger Training course. Participants will be able to demonstrate fundamental flagger procedures and develop a basic traffic control plan for a standard two-flagger operation.

Participants are evaluated on five modules: basic work zone safety; flagger qualifications; hand signaling; flagger stations; and automated flagger assistance device. They are also evaluated on their ability to use STOP/SLOW paddles to direct vehicles and their ability to use a flag to direct vehicles.

Upon successful completion of the course, participants will receive their certificate of completion that is valid for a period of four years.
