Fax: (828) 456-8797

J.M. Teague Engineering & Planning (JMTE) performed a sign assessment to determine the feasibility of expanding the existing LOGO program located before and between US Highway 74 at interchanges 178 (US 221), 181 (US 74-A), and 184 (Old Caroleen Road).

JMTE assessed qualified businesses, determined interest, and analyzed the physical feasibility of adding LOGOs while taking existing LOGO signs into consideration.

A feasibility report was completed in accordance to NCDOT guidelines and presented to the Town of Forest City.
