

TRAFFIC VOLUME DATA COLLECTION

CLIENT:

Mattern & Craig

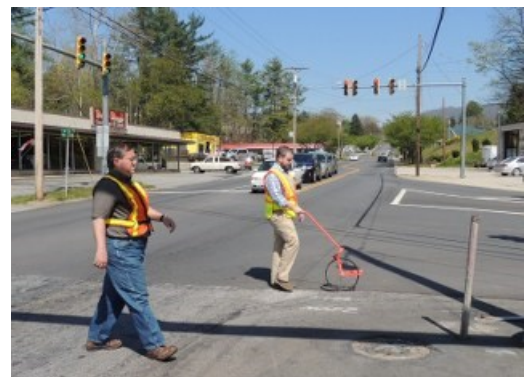

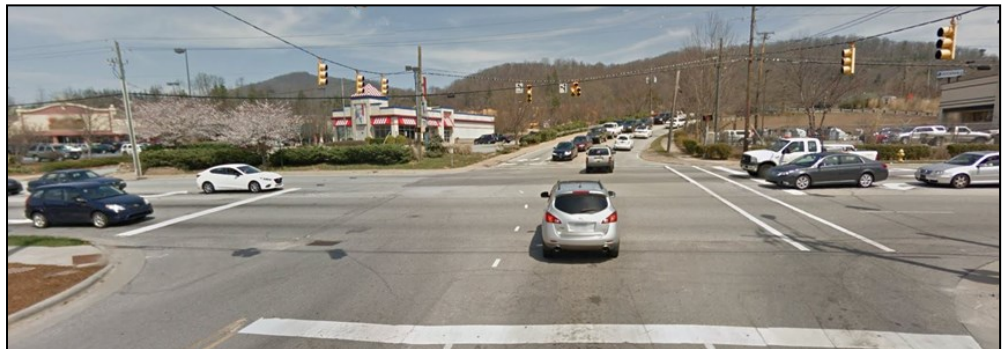

JMTE SERVICES:

- NCDOT Communication
- Collaboration with City Transportation Department
- Turning Movement Counts
- Data Analysis

LOCATION:

Asheville, NC

J.M. Teague Engineering & Planning (JMTE) provided services related to conducting peak hour turning movement counts at four intersections in Asheville, NC. Counts were conducted during the week in order to obtain existing (baseline) traffic volumes and conditions. In accordance with NCDOT requirements, turning movement counts were conducted while schools and colleges were in session. Verbal confirmation was acquired by the field technician assigned to this project. Data was presented in PDF format with a quick turnaround.
