Phone: (828) 456-8383
Fax: (828) 456-8797

J.M. Teague Engineering & Planning analyzed and made recommendations concerning the town's on-street parking along Main Street. This area included most of Historic Downtown Franklin containing a dense collection of shops, restaurants, parks, and offices. The area captured a large amount of pedestrian activity.

While the study largely focuses on parking along Main Street, other factors were also examined in order to best suit the context and help the residents and businesses that make this downtown area a place to do business, relax, or shop.
