- Road Closures

LOCATION:

Asheville, NC

J.M. Teague Engineering & Planning (JMTE) served as traffic control project manager on the Asheville, NC film set for a well-known Armored Car production. Later the film was titled Masterminds. JMTE drafted and sealed a traffic control plan for the detours, road and lane closures required for permitting through the North Carolina Department of Transportation (NCDOT). JMTE coordinated the on-site traffic control at multiple film sites, over a period of weeks. JMTE coordinated with multi-agency that included the cast and crew of Armored Car Productions, the NCDOT and the City of Asheville. JMTE was responsible for the scheduling of barricades and signage for road closures, as well as providing man power for on-site traffic control during the filming of the feature length film. Additionally, JMTE worked with local companies to coordinate the delivery, setup, management and removal of barricades and signs for multiple road closures associated with production.
